# MediTrack

Ready To Take Control?

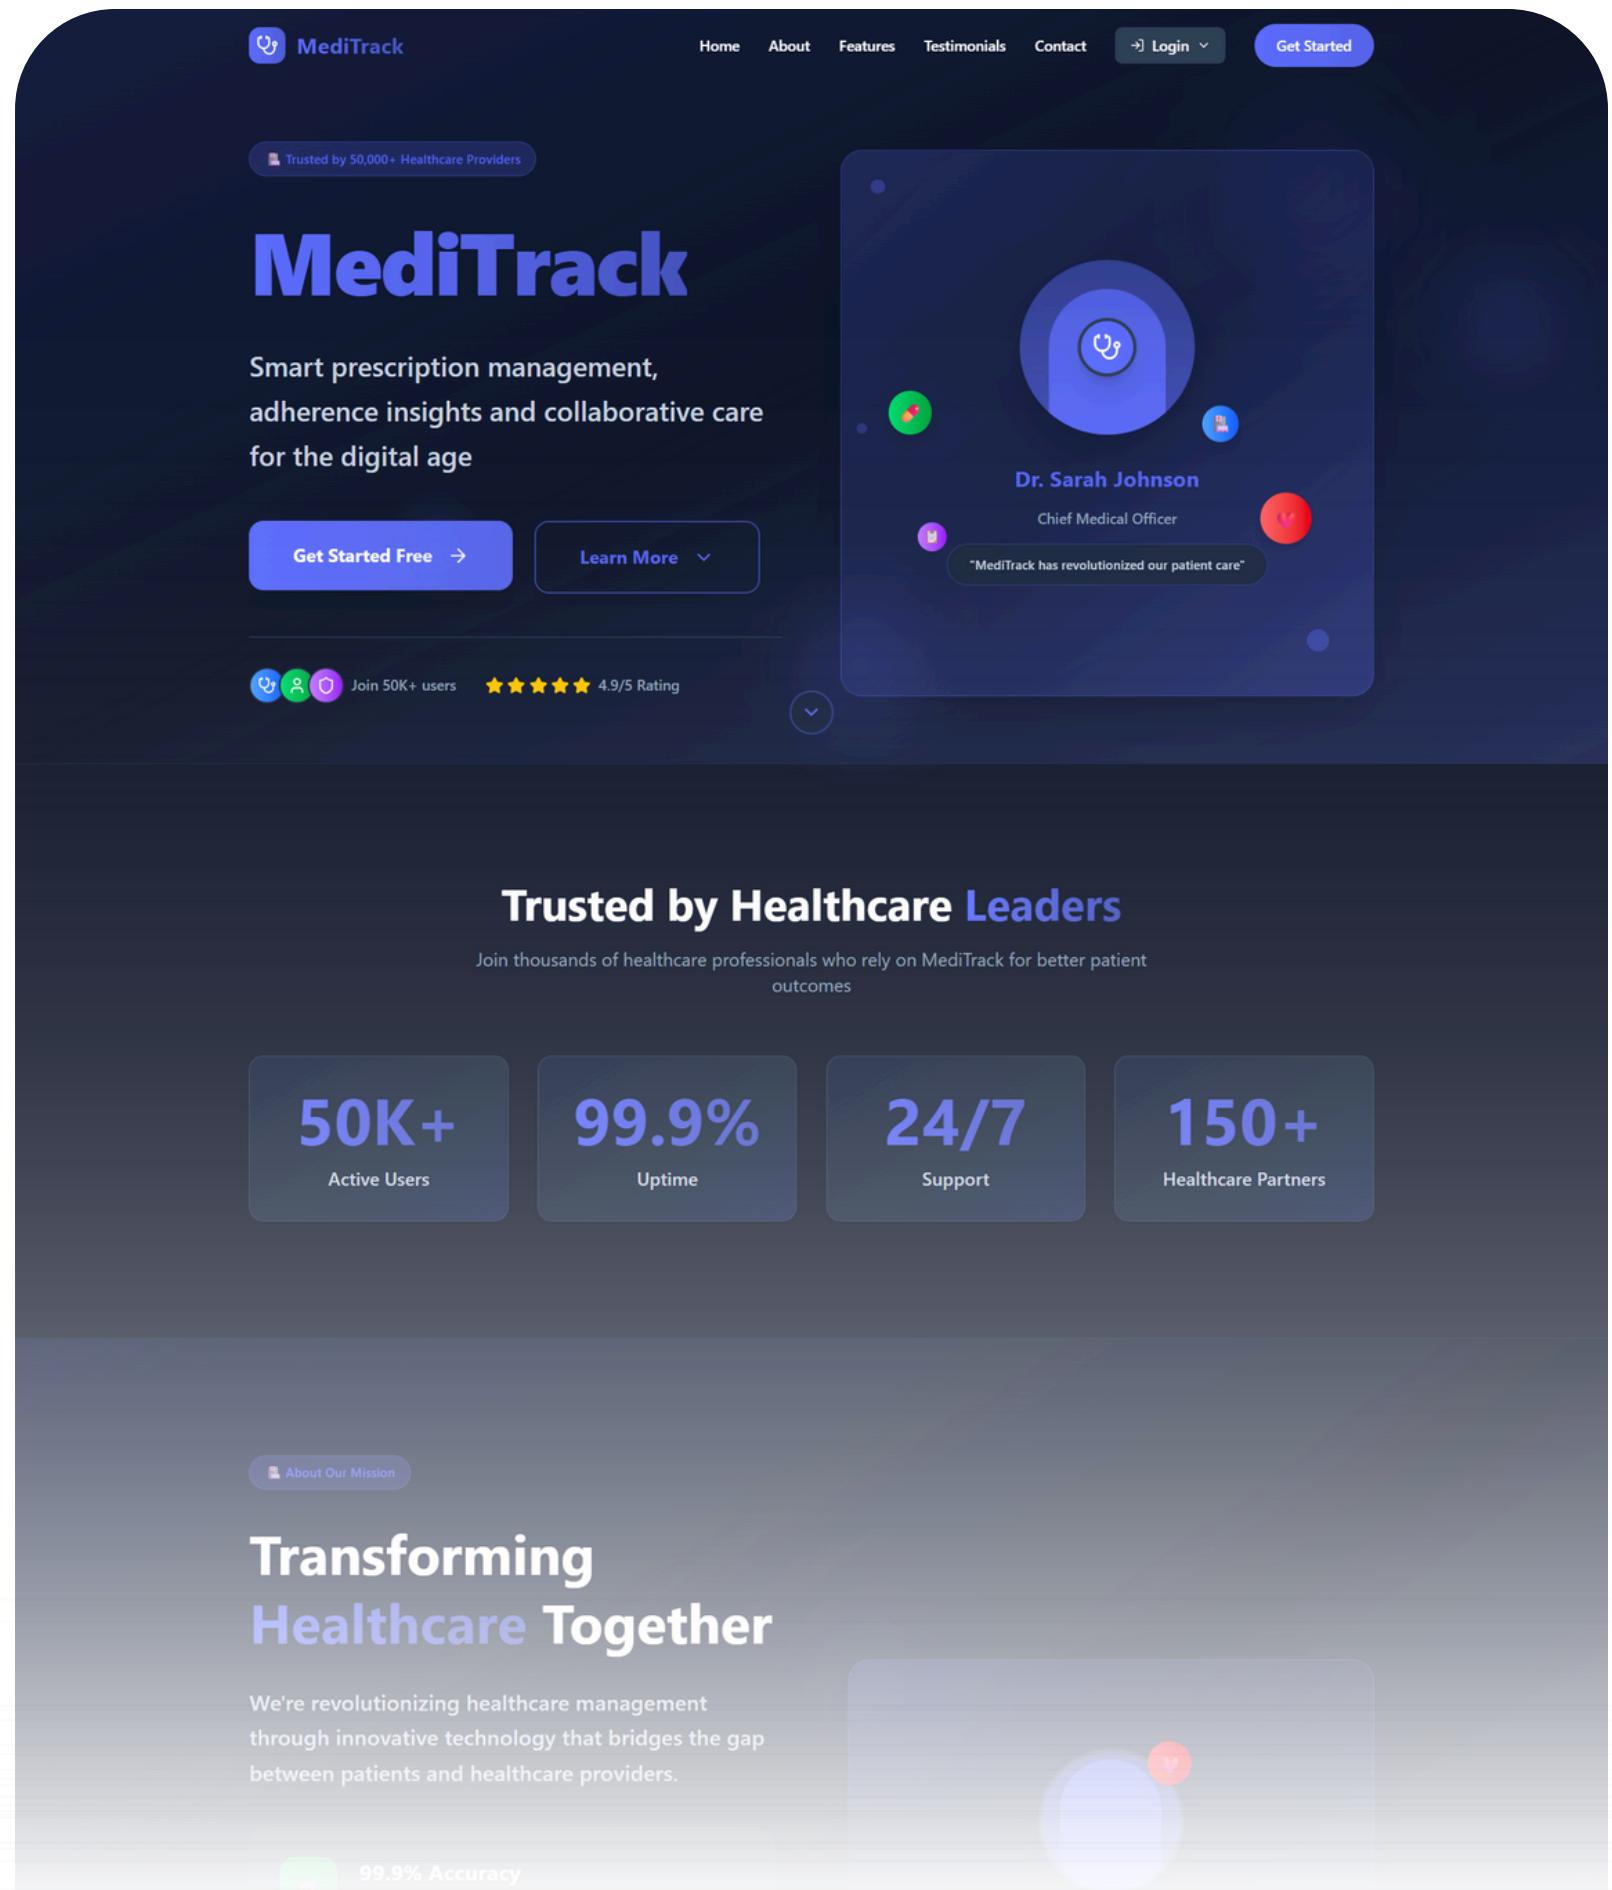

# Problem Statement

2. Create a smart solution that helps patients with complex prescriptions manage and remember their medication schedules.

# About the Project

Meditrack is a smart health app designed to help patients manage complex prescriptions and lead healthier lives. It simplifies medication schedules with reminders, digital tracking, and refill alerts to prevent missed or incorrect doses.

The app also offers Anonymous Peer-Support Communities, where users can connect, share experiences, and support each other in a safe, private space. Additionally, AI-Powered Meal Planning helps create personalized diet plans and shopping lists based on individual health needs.

MongoDB

Express JS

React JS

Node JS

# Features

## Smart Prescription Manager

A built-in MediTrack feature that reminds patients when and how to take multiple medicines. It reduces the risk of missed doses or overdosing, especially for those with long-term or complex prescriptions. It includes alarms, digital pill tracking, and pharmacy refill reminders.

## AI-Powered Meal Planner

MediTrack generates personalized diet-based meal schedules and auto-creates shopping lists. It adapts to dietary restrictions, allergies, calorie goals, and cultural preferences, ensuring patients stay consistent with their health and fitness goals.

## Anonymous Peer-Support Communities

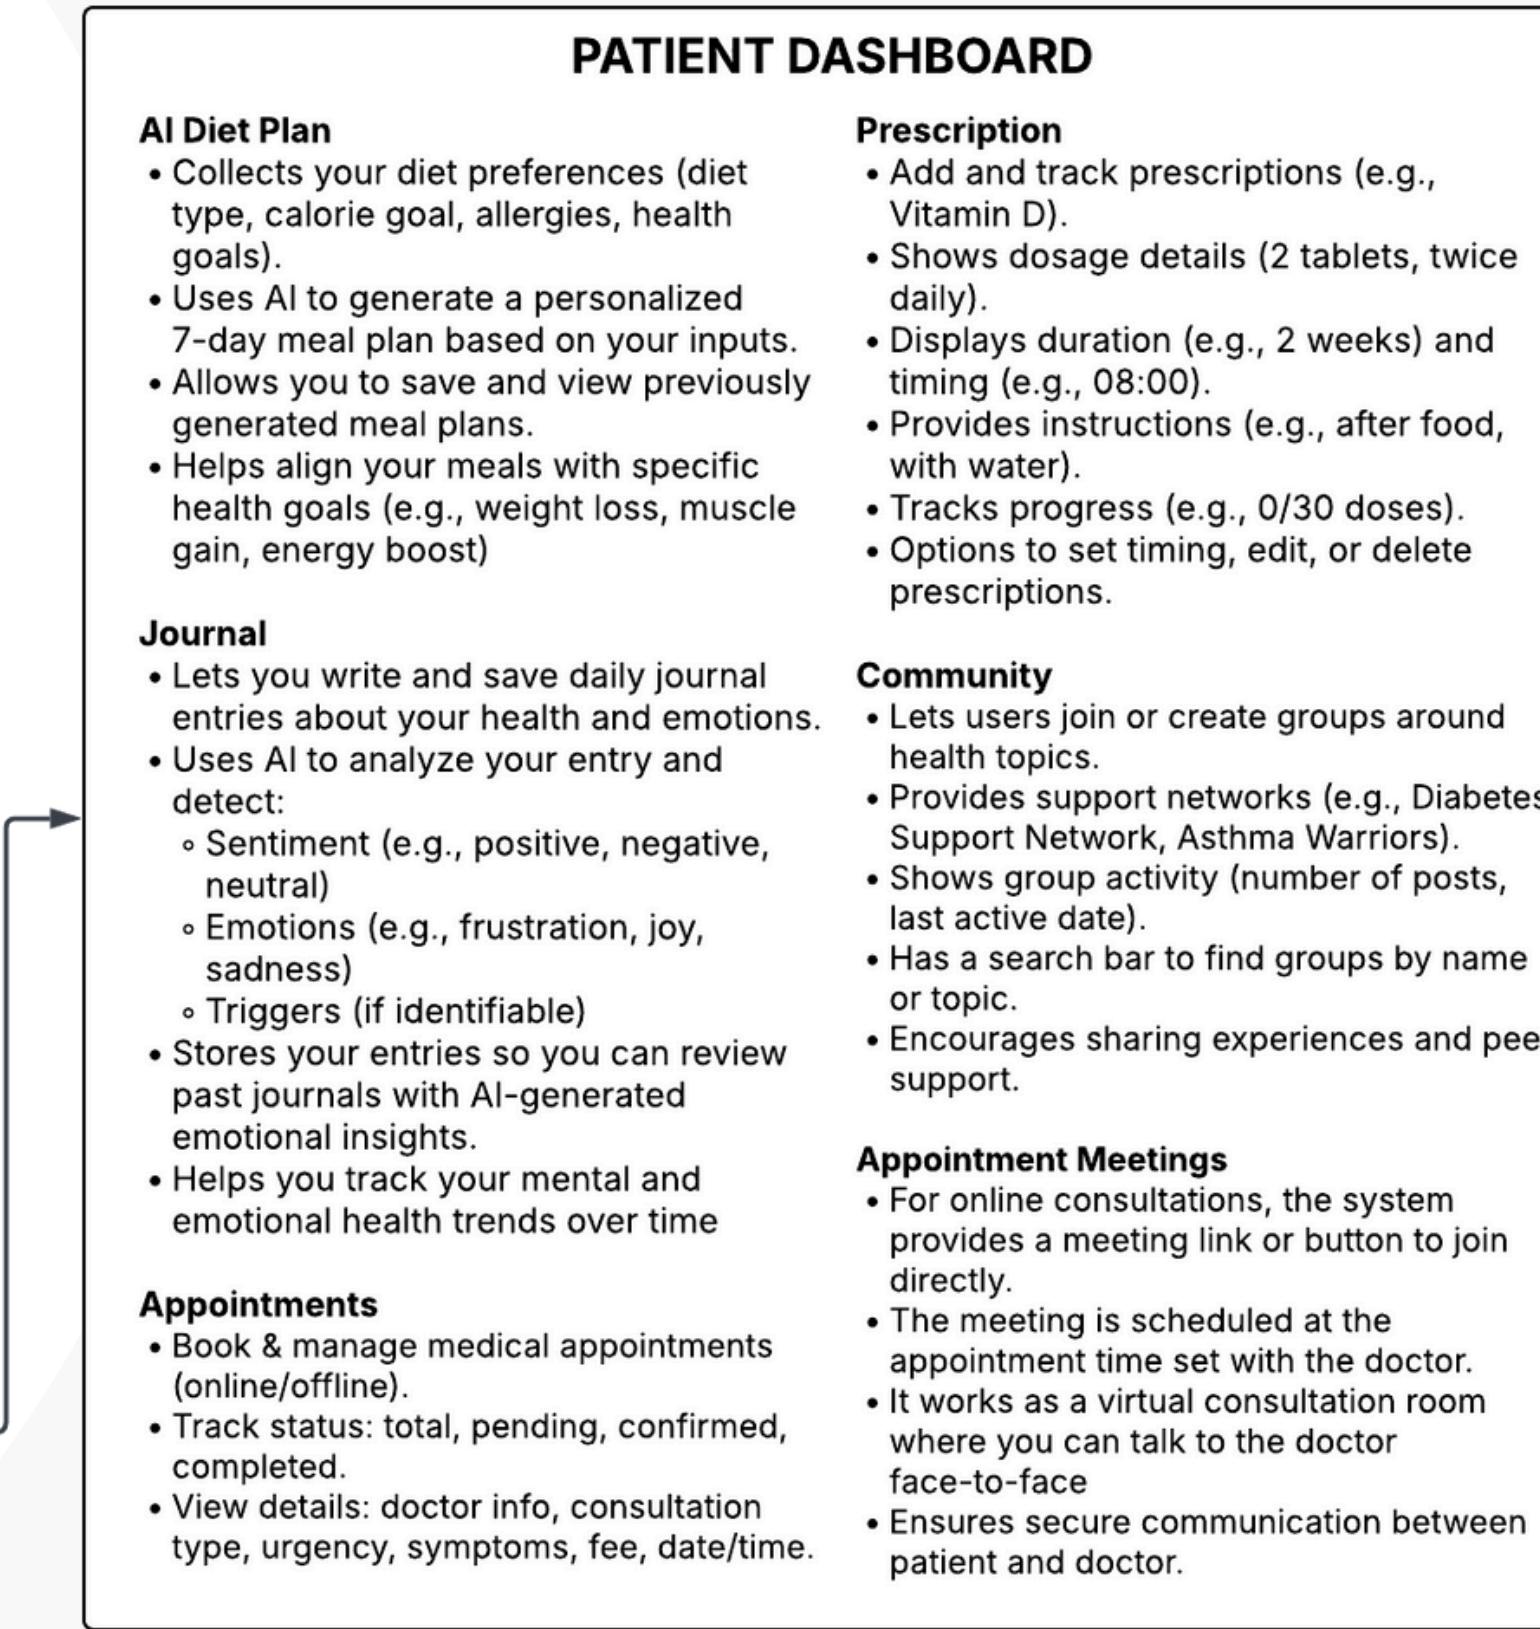

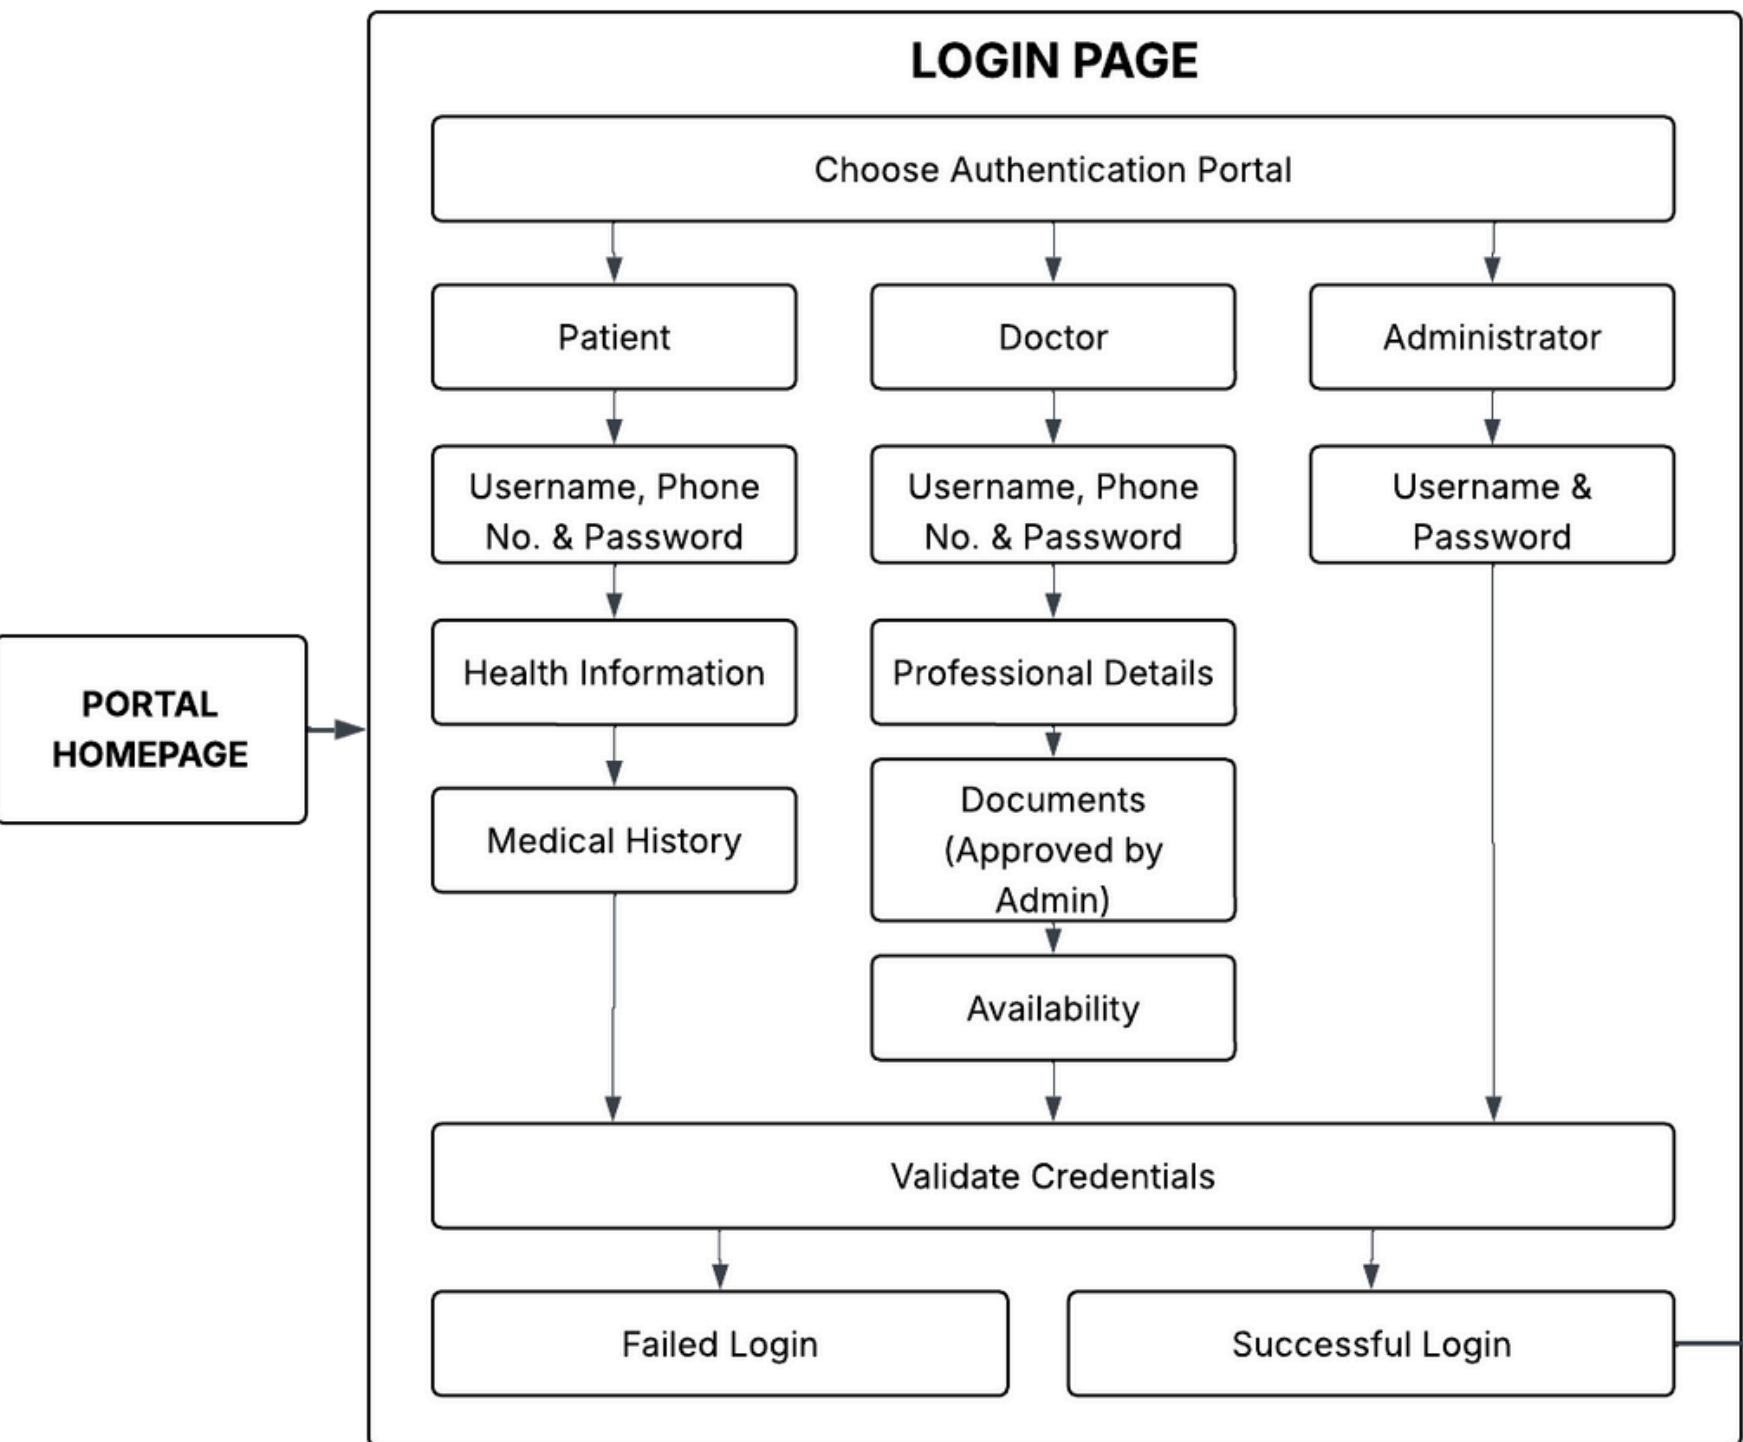

Safe, judgment-free spaces within MediTrack where users can discuss health and mental well-being. Privacy and anonymity encourage openness, allowing patients to share experiences and receive peer support without fear.

## Smart Health Journal

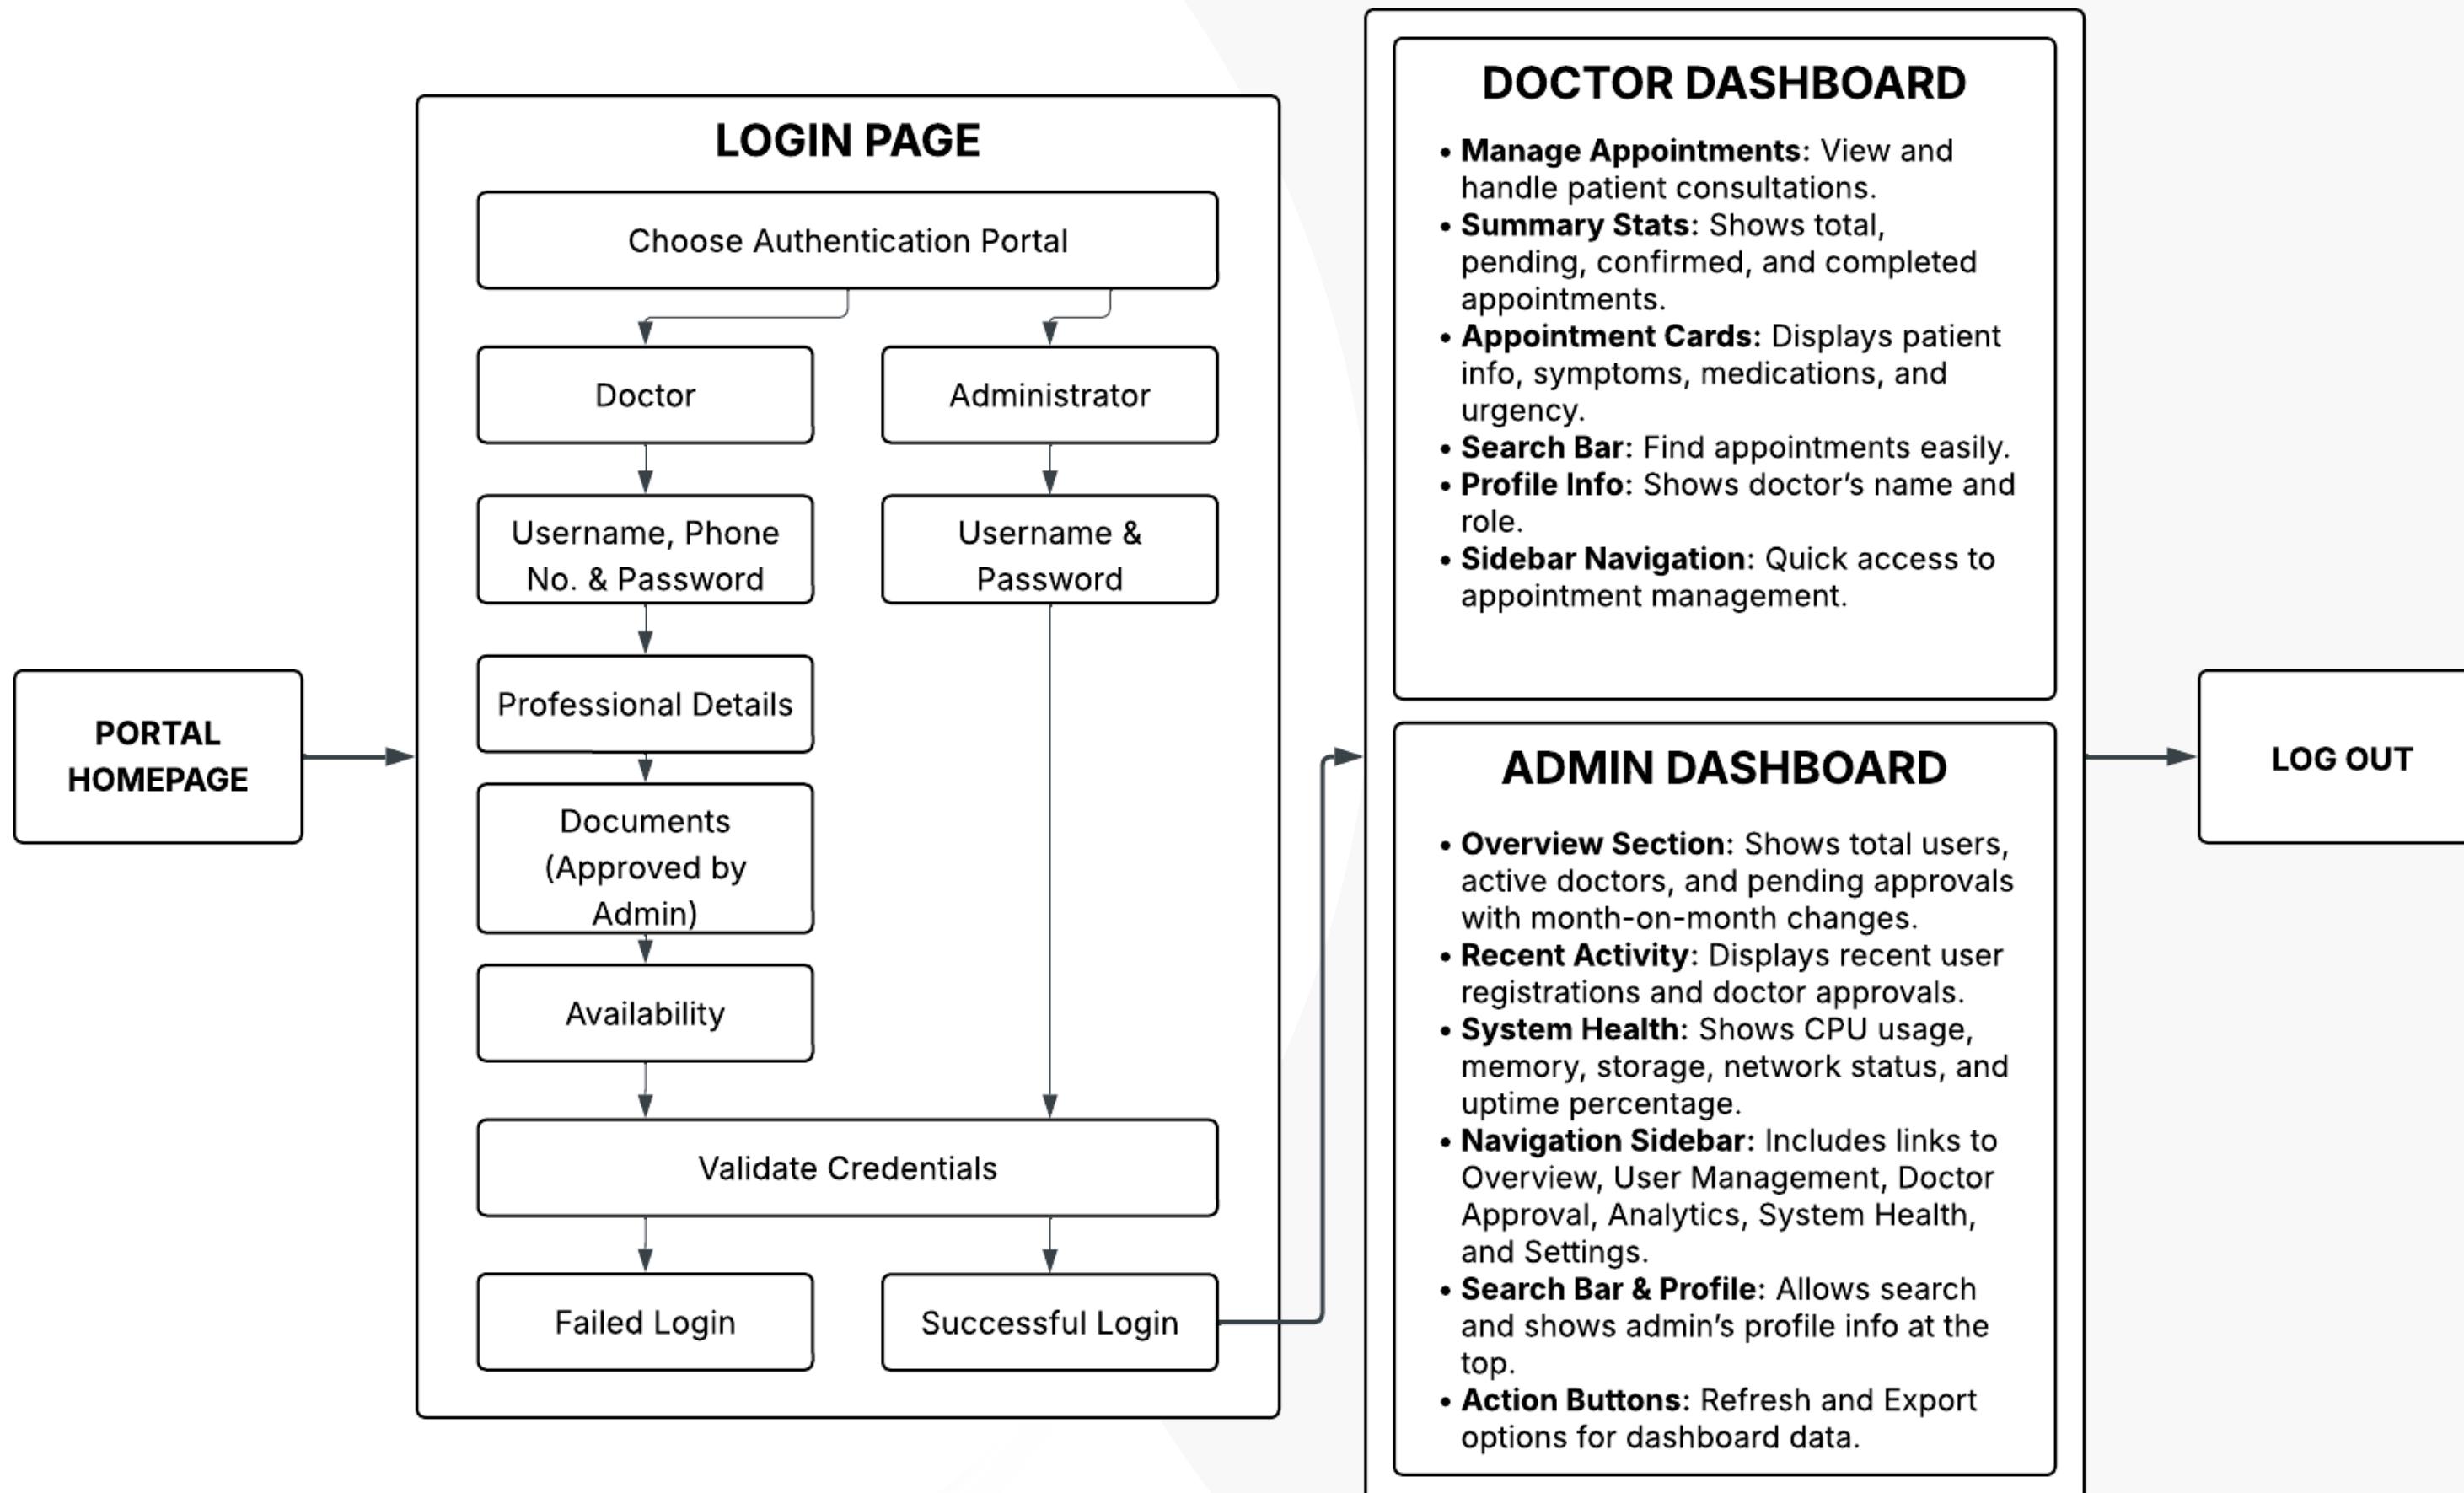

A digital journal that analyzes patient entries to detect stress patterns, mood changes, and emotional triggers. By providing insights into mental and emotional health, MediTrack helps users track progress, identify hidden triggers, and improve coping strategies.

# Future Scope

- Integration with wearable devices for real-time health monitoring and alerts.
- Telemedicine support for virtual consultations with healthcare professionals.
- AI-driven predictive analytics to identify health risks and offer preventive care.
- Multi-language support to serve users across different regions and cultures.
- Partnerships with healthcare providers and insurance companies for seamless treatment and coverage.
- Enhanced data security and privacy to ensure user trust and safe management of health information.
- Expanded peer-support communities with expert-led workshops and additional resources.
- Tools for caregivers to assist families in managing patient health effectively.

# Thank You
